Dave - thank you for your message. I believe receiving your information early next week will still work with our timeframe. We will be doing government to government consultations with the Tribes and meeting with the State of Washington the last week of February and the first week of March. Also, just to let you know, I am on a temporary detail assignment to another office in EPA Region 10 and have stepped out of the Lake Roosevelt project temporarily. Tom Eaton, Director of our Washington Operations Office, is fulfilling my role during my absence, and Dave Croxton, who you met at our meeting, is the Unit Supervisor for the project and the staff working on this site. Please send the information directly to Tom and Dave. Thank you.

Subject: Request for more information

I am sorry that I have not provided the required information on the proposed consensus-based approach to Lake Roosevelt sediment issues. We have prepared a document and need to internally review it before we send it out to you. I expect that we will be able to do this early next week. I hope that this still meets your needs. Please let me know if this timeline is not acceptable. Thanks
